# LIZFARIA
## SOFTWARE DEVELOPER

www.lizfaria.ca 👋 hello@lizfaria.ca 👋 @lizcookscode

## ABOUT

Hi, my name's Liz and I'm a software developer based in Toronto who specializes in JavaScript and React. I work hard because I love the limitless possibilities for learning, connecting and creating that comes with development. I'm looking to join a team that fosters these values through mentorship and opportunities for professional development.

## EXPERIENCE

### FULL STACK SOFTWARE DEVELOPER
*TouchBistro, March 2019 - Present*
- collaborate with an agile team to add new reporting features to improve customer's business insights and experience, as well as improve existing performance, data reliability and accessibility
- led the migration of the frontend codebase to a more maintainable and performant codebase using ES6, TypeScript, Node, React, React Context, and unit and integration testing JS frameworks

### FRONT-END DEVELOPER
*Tennis Design, September 2018 - October 2019*
- develop websites for major education, arts, science, technology and business organizations using JavaScript, jQuery, CSS, HTML, Django templating and Git
- stay informed with innovative web technologies, web design trends, and best practices in backwards compatibility, responsiveness and accessibility
- work with designers and a back-end developer to scope, refine and implement invision prototypes

### MENTOR
*Canada Learning Code & Juno School of Technology, April 2018 - present*
- engage with students, clarify class material, and mark projects for the Accelerated Web Development and JavaScript Courses at Juno College of Technology
- empower budding developers to feel a sense of belonging and excitement about tech and coding

## EDUCATION

### SOFTWARE DEVELOPMENT
*Bridge, Oct 2019 - Dec 2019*
Advanced program focusing on ES6, React, Redux, Test-Driven development, Git Flow, Agile development and leadership skills.

### WEB DEV BOOTCAMP
*HackerYou, Apr 2018 - June 2018*
Intensive program with a focus on JavasScript, React, CSS, HTML, Pair Programming and Git skills through hands-on, project-based learning.

### B.A. PHILOSOPHY + SOCIOLOGY
*University of King's College, Sept 2013 - May 2017*
First class honours in Contemporary Studies and Sociology.

## FEATURED WORK

### REACT / FIREBASE / NODE
*Bridge Applications App*
Admin can access all previous cohort application forms and add new forms. Perspective students can fill out and submit open applications.

### REACT / GATSBY / GRAPHQL
*Textile Museum of Canada PWA*
Admin can add object pages and create multimedia hotspots on objects for users to interact with to learn more about exhibition pieces.

### JAVASCRIPT
*Factor Annual Report Website*
Users can select and stream music on the audio player as they navigate through artists. Received Awwwards honorable mention.
